Airborne - Defense Surveillance Mission System

CONTROP
Turning Vision Into Reality

- A-DSMS systems are defense helicopters and light ISR A/C, integrated with CONTROP's HD EO/IR high performance airborne payloads
- A-DSMS systems provide a fully equipped, ergonomic Operator Console including an advanced Mission Management Computer, a large HD Display and a high capacity DVR
- A-DSMS systems are a complete solution for Airborne Defense Surveillance Missions

Main Advantages of CONTROP's Systems:

- Modular, fully integrated complete solution
- Ideally suited for airborne surveillance missions
- Variety of CONTROP's high performance HD EO/IR Payloads
- Operator Console designed for convenient operation during prolonged missions
- Advanced Mission Management Computer with mission planning and debriefing
