

iSea-20

Surveillance System For Maritime Missions

The iSea-20 is a member of the iSea family of compact observation systems that were especially designed for the harsh maritime environment.

The iSea systems provide maximum sensor range performance by using highly sensitive sensors, gyro-stabilization and unique video enhancement algorithms.

CONTROP's iSea family of EO/IR systems may be integrated with the vessel's systems and offer a full solution for naval and maritime operational requirements.

CONTROP's iSea family of EO/IR systems have been in worldwide daily operation since the 1990s, on a wide variety of maritime vessels.

Applications

- Search & Rescue
- Border Surveillance
- Law Enforcement
- EEZ Protection
- Counter Piracy
- Special Operations

Features

- Superior Gyro-stabilized Image
- Multi-Spectral Imaging
- Advanced Image Processing
- Lightweight and Compact Design
- Naval Qualified
- Integrated with Vessel's Systems

 Thermal Imaging detection range to small boat target

- High Performance
- Mission Proven
- Fully Integrated
- Cost Effective
- Low SWaP
